

**GT-A32**  
**Yarn Abrasion Tester**

### Application

Yarn Abrasion tester mainly applied to measuring wear resistance of yarn, strands and other textile materials. Coupled with the appropriate accessories.

### Features

- ❖ Adopted uniform friction. Twenty samples can be test.
- ❖ Using a micro-computer to detect and data precessing.
- ❖ It can be shown for each batch of yarn that the average number of wear, coefficient of variation, maximum, minimum and single value of 20head.

### Key Specification

Model	GT-A32
The number of test samples	10
Friction mode	uniform speed
Friction speed	about 60 times/min
Data output items	maximum, minimum, average number of friction, friction coefficient of variation of the number, a single value
Output	print
Weights	5g, 10g, 20g and 20pcs for each
Abrasives	Sandpaper
